

## H2 Logic to supply hydrogen fueling station for H2 Mobility Germany – with option for multiple repeat-orders

**H2 Logic A/S, a leading manufacturer of hydrogen fueling stations and a subsidiary of Oslo Stock Exchange listed NEL ASA, has been awarded a contract for one H2Station® fueling station for H2 MOBILITY Deutschland GmbH & Co.KG with an option for multiple repeat-orders. The station will be one among the first in a planned staged expansion onwards 2023 of up to 400 stations in Germany and a total investment of around € 400 million (\$375m).**

*This press release is issued on basis of and subsequent to the NEL ASA market announcement to the Oslo Stock Exchange: [www.newsweb.no/newsweb/search.do?messageId=391077](http://www.newsweb.no/newsweb/search.do?messageId=391077)*

H2 MOBILITY Deutschland is a joint venture between six industrial companies - Air Liquide, Daimler, Linde, OMV, Shell and Total. The action plan for H2MOBILITY envisages a Germany-wide network of hydrogen fueling stations by 2023, which would make Germany the first country to offer an inter-regional network where fuel cell vehicles (FCEVs) can fill up with hydrogen.

The H2Station® to be supplied by H2 Logic, will be part of stage one of the action plan, that envisages the accelerated set-up of 100 stations over the next few years. The H2Station® will be installed in Rostock, Germany during 2016. The order includes an option for multiple repeat-orders for other German cities.

H2 Logic will build on years of experience in installing and servicing H2Station® in seven European countries, including Germany, and a long track-record of reliable operation and high performance. Earlier this year H2 Logic was the first in Germany to achieve approval for fueling, by the Clean Energy Partnership (CEP) after extensive third party fueling verification tests.

Jacob Krogsgaard, CEO of H2 Logic states:

*“We look forward to provide our H2Station® fueling solution to H2Mobility Germany. This provides H2 Logic a strong showcase and presence in Europe’s key market for hydrogen fueling. It also shows that our H2Station® technology and track-record is appreciated by our customers.”*
